REDUCERS, INK AND CHEMICALS

KRISHNA INK®

COMPANY PROFILE

Year of establishment 2001, we Krishna industries are occupied in manufacturing of screen ink, industrial solvent, Paper ink, Industrial chemicals, Flexographic inks, and offset printing ink. These products are widely admired among our esteemed patrons owing to their excellent quality, longer shelf life and various packing option. Beside this, clientele can easily buy these products from us at nominal prices.

- ❖ *Location : At Ankleshwar (Gujarat)*
- ❖ *Manufacturer of Reducers, Thinners & Various Chemicals. Useful for*
 - ✓ *Screen printing industries.*
 - ✓ *Offset Printing industries.*
 - ✓ *Plastic printing industries.*
 - ✓ *Metal surface Coating chemicals and many other chemicals*
- ❖ *We give best possible service to printer providers and paint industry*
 - *Prompt Delivery.*
 - *Good packing.*
 - *Any Quantity.*
- ❖ *Efficient & helpfull staff.*
- ❖ *Efficient dealer Network All over India*

KRISHNA INK®

FOR SCREEN PRINTING INDUSTRIES

VINAYLFIX GLOSS INK - KVS-100

Hi Gloss finish PVC Solvent base ink fast drying , excellent blocking law odour on suitable subtract like Pvc, cardboard, Paper.

VINYLFIX MATT INK – KVM-200

Matt finish PVC Solvent base ink fast drying , excellent printability high opacity, Alcohol resistance and light fastness on suitable substrate like Pvc, cardboard, Paper

ECONOMY MATT INK - TM-400

Matt finish pvc solvent base ink with good printability.

ECONOMY GLOSS INK – SG-300

Gloss finish pvc solvent base ink with good printability.

POLYBOND INK – PB-800

Polybond ink are specially formulated solvent base quick drying inks to print packaging containers and articles polyethylene, HDPE, polypropylene These inks are suitable for high-speed automatic printing machines. The surface of these substrates should be pre-treated by flaming or corona discharge.

PLASTISOLE INK – PL-700

Plastisol ink with soft-feel, hi-opaque series, All brilliant colours with wash-resistance and good-printability workable with both light & dark coloured fabrics. Wide range of colours suitable for both automatic and manual printing machines

CHEMICALS FOR SCREEN PRINTING

PVC REDUCER – RL-1944

Use full for screen printing on PVC And Various types of plastics , Most Economical and windily used in the screen printing industry.

PVC REDUCER – SCC – RL-1945

Super Quality product .Use full for screen printing on PVC And Various types of plastics used in the screen printing industry.

GLOSS REDUCER – RL-1001

Use full for screen printing on paper, show cards, greeting card, and cardboard for super gloss effect.

GOLD MEDIUM – KVM-245 (Pvc medium) Use for metallic inks (silver and gold)

KRISHNA INK®

PVC RETARDER – RL-1302

Use full in hot atmosphere when printer faces the problem of chocking-up of the screen and smooth running of squeezes becomes difficult with use of PVC retards (RL-1302) both the problem are solved.

2 PACK REDUCER – RL-1901

Excellent performance in 2 Pack ink.

SCREEN RECLAIMING CHEMICALS

- ❖ **D COTING POWDER** : High quality screen washing powder. Suitable for nylon & polyester mesh.
- ❖ **SENSITIZER** : Sensitizer is use in screen coating for better result.
- ❖ **SCREEN COATING** : Special screen coating which gives freedom of using both solvent and water base ink.

FOR OFFSET PRINTING INDUSTRIES

SUPER CHROMO PROCESS INK

Super chromo is fast setting inks series base on advance printing technology suitable for printing on board and uncoated paper.

NITSU SERIES

Nitsu are suitable for all sheet-fed offset presses and damping units, in particular for multi-color presses. Their excellent solvent release capabilities enable them to achieve very good stacking performance, immediate turning and further processing.

NONWOVEN SERIES

The Nonwoven series is ideally suited for Non woven fabrics types of jobs on different substrates, where the highest demands are placed upon the inks. This inks give very good colour brightness and strength.

HD PROCESS SERIES

HD Process is the fast setting and quick drying sheet fed process series, which is suitable for a wide range of absorbent substrates, due to its high resistance to mechanical stress. The fast setting, good rub resistance and combination with ideal trapping characteristics, ensure a captivating contrast of the printed image.

POPULAR SPOT COLOUR

Popular inks is fast setting ink series based on advance printing technology suitable for printing on duplex board (Uncoated) and map litho paper.

KRISHNA INK®

FLORAL SPOT COLOUR

Floral Series inks is fast setting and good rub resistance ink series based on advance printing technology suitable for printing on duplex board (Coated and Uncoated) and Art paper.

COLDSET (WEB INK)

Web process colour, news black, book black are available.

CHEMICALS FOR OFFSET PRINTING

PHOSPHORIC ACID
BENZENE
IPA
MIX DRIER
GELL TECH REDUCER

BLANKET WASH
LAMINATION THINNER
U.V. WASH
WAX COMPOUND
O/S INK AID

OTHER CHEMICALS

N C THINNER HIGH GLOSS (FOR HIGH GLOSS FINISH)

Use full for painting on metal surface and Auto with N C lacquer paints.

G P THINNER (FOR SUPER FINISH)

Use full for painting on metal surface and Auto with N C lacquer paints.

STOVING THINNER

Use Full for painting on metal surface with stoving lacquer paints.

EPOXY THINNER

Use full for long lasting and hardened epoxy paint coating

LIST OF OTHER CHEMICALS
